

LEGION™

Proprietary blend of surfactants100%

TECHNICAL INFORMATION BULLETIN

What is Legion?

A specially designed surfactant for Glufosinate formulations to maximize performance by providing the proper surfactant load for the specific product applied.

What does Legion Offer?

- Convenient surfactant adjuvant formulated for glufosinate applications
- Multicomponent surfactant adjuvant for superior performance with all non Liberty branded glufosinate chemistries
- Maximizes glufosinate formulations by utilizing the correct surfactants for these applications

(Do Not Use With Liberty® Brand Glufosinate)

Mixing Order

1. Fill tank 1/2 full of water and begin agitation.
2. Add the required amount of Array to the tank while agitating.
3. Continue filling spray tank with water and add the glufosinate-based herbicide and other pesticides to tank, while agitating.
4. Add required amount of Legion, while the remainder of the tank is filling.

Rate

10-12 oz./Acre

Package Size

2x2.5's
